Dear Customer,

Many of our contacts have been unsettled by the open discussion on the topic of plastics over the last few months and are asking about alternative materials. As we also work with plastics, we too have thought about how to move forward with this. Firstly, one must understand that many of our products have a long-term use guaranteed by UV-stabilisation and functionality. A move away from the classic plastic is difficult to imagine in this case.

However, we are already familiar with some alternatives, e.g. we were the first manufacturer of shelf edge profiles made from PLA which were presented at EuroShop 2011; In Austria we have been working for over 6 years with a range of additional and replacement products made from natural material based plastics under the title of "Bio-Logic". Even when enquiries were few, we remained on the case.

To give you a better overview of our capabilities, we have started to label the relevant products as below in this catalogue and in our webshop.

Our wide range of products unfortunately cannot all be shown in this catalogue but you will find further **marked products and new developments** on our website.

This 2020/2021 catalogue is made from FSC certified paper – part of our contribution to protecting the environment, alongside many internal measures within the company such as the use of LED lighting, closed loop raw materials and solar energy.

To this end we wish you continued success through the dynamic support of the VKF Renzel team.

With greetings from West Münsterland,

The Managing Directors of VKF Renzel

RENA renzel NATURE

Bioplastics / Natural Material Based Plastics / Paper / Wood

RECYCLED

Products made predominantly from recycled plastics (recycled materials from waste systems)

Natural presentation to reduce packaging in retail

COMPANY OVERVIEW

Product development and design.

We start the search for a solution as soon as we receive your enquiry.
The first phase of the **creative process** is brainstorming.
The ideas are put on paper in the form of product sketches and discussed with you. Then follows the technical planning with the help of **CAD technology**. To better visualise the products we create virtual models which contain all the details for later production.
In the next step we create prototypes in which the models are mostly made using **3D printing**. At this stage the finished look of the product can be recognised. The prototype serves as the final product control.

Plastics processing

We convert plastics in to displays for different purposes. These plastics include **acrylic (PMMA)**, **ABS**, **polystyrene (PS)**, **PVC**, **polycarbonate (PC)**, **PET** and **bioplastics** which are manufactured from sustainable raw materials. More and more industries are using recycled materials, particularly plastics waste, which closes the material life cycle and preserves resources.

We use the following processes with plastics: **extrusion**, **injection moulding**, **thermoforming** and **high frequency welding**.

Metal Processing

In metal processing we use semi-finished parts in aluminium, steel and stainless steel. These are worked on in the different production areas to create a finished product.
Finishing techniques such as **lasering**, **stamping**, **chamfering**, **milling**, **forming**, **nibbling**, **welding**, **sawing** and **pressing** are used.

The surfaces of the finished products are refined with processes such as **powder coating**, **galvanising**, **chrome plating** or **anodising**.

Wood processing

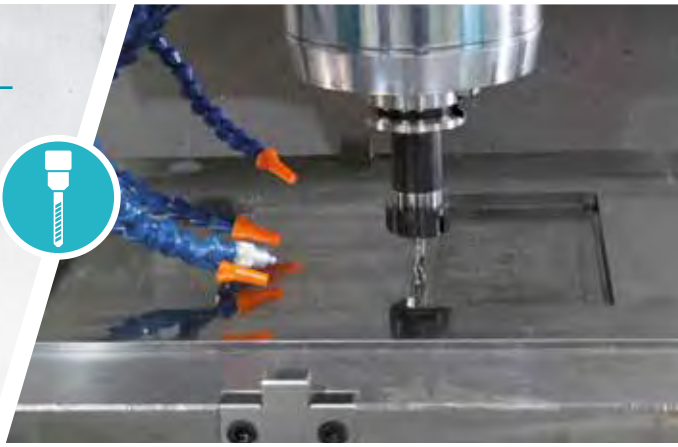

In contrast to plastics is the naturally occuring raw material wood.
To be able to offer alternative materials we also process wood.
Displays in wood give modern POS a high quality, natural appearance.

In combination with other materials such as metal or acrylic, displays are created which have that certain something. As well as **sawing** and **planing** we work with **CNC routers**.

Tool Production

So that the various plastic processing methods can be used, we make the required tools ourselves, e.g. **punches** for PVC processing, **extrusion tools** for extruded products, **vacuum forms** and injection **moulding tools**.

The files for creating these tools are defined using models from product development. With the help of tool production, third party tools can be adapted to and used with our machines.

Printing

Nearly all products can be customised with a print. To realise all customer requirements **screen**, **digital, transfer**, **pad** and **offset printing** are used.

Additionally there is the option to finish products with **engraving**, **etching** or **embroidery**.

Assembly and Logistics

In the logistics department storage, management, picking and packing take place across an area of 6000 m². A range of services such as **assembly**, **distribution** and **storage** are offered to allow customer-friendly despatch.

Fully **automated** and **paper-free picking** promotes sustainability and in addition offers shorter picking times which in turn ensure a quick despatch of products. Shipping is via freight forwarder or courier.

Services: renzel.agentur

The in-house advertising agency renzel.agentur supports you in presenting your company. The services run from the creation of a **corporate design** through headed paper to **classic printed media for your company**. Furthermore, up to date **websites**, complex **online shops**, **permanent maintenance** of the websites and **hosting** of the websites are taken over. renzel.agentur allows VKF Renzel GmbH to offer customer specific **order platforms** which round off the fulfilment range of the company. The range of services of renzel.agentur is completed with the development of extensive **cross-media campaigns**.

Leaflet stands are the best solution to display your brochures or catalogues directly at the point of sale. The brochures can all be seen, look inviting and can immediately be picked up by customers. In our wide range we offer leaflet stands of differeng types and function. On the following pages is a small selection from our range. In our in-house production facility we also have the option to create leaflet stands to suit your specifications. We would be happy to provide you with a quotation.

Poster and leaflet displays allow posters to be presented with the additional option to make information in the form of leaflets available to customers at the point of sale bereitzustellen. Thanks to a whole range of models as well as the possibility to customise, you can create the perfect product to suit your requirements.

Poster and Leaflet Stand "Score P"

This display looks particularly classy thanks to its elliptical aluminium upright. The silver anodised aluminium click frame and the acrylic tray are attached to the silver anodised upright and can be removed for transport. Stability comes from the steel base powdercoated black similar to RAL 9005.

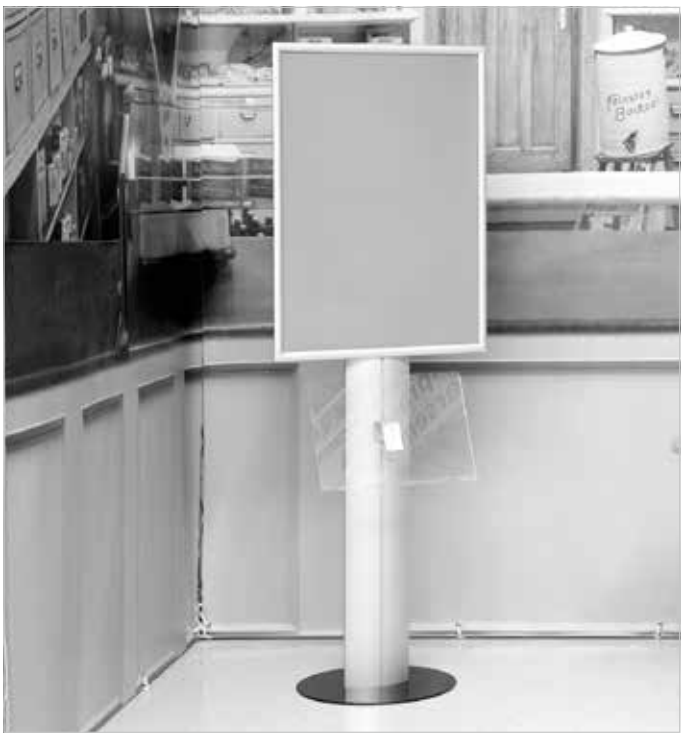

Version: 1-sided; Profile width: 25 mm; Type of corner: mitred;
Insert size: A1 (594 x 841 mm); Orientation: portrait;
Base diameter: 450 mm; Colour of shelf: crystal clear;
Shelf size: A3 landscape / 2x A4 portrait; Total height: 1800 mm
51.0131.1

Also available in special sizes for orders of just 1 piece!

1. Also available with a silver base!

Current prices can be found on our website.

Poster Stand with A4 Leaflet Holders "Quattro"

This display impresses with its flexibility! The silver anodised aluminium click frame can be hung in place and the two clear acrylic leaflet holders are screwed in to the channels of the "Quattro" upright. The display is stabilised by a steel base powder coated silver similar to RAL 9006.

Version: 1-sided; Insert size: A1 (594 x 841 mm);
Orientation: portrait; Material of upright: aluminium;
Colour of upright: silver anodised; Base diameter: 450 mm;
Dispenser size: A4 (210 x 297 mm) portrait format;
Total height: 1800 mm

51.0002.1

Poster Stand "20 / 30"

Thi simple poster stand has space on both sides to display your promotional info. Both silver anodised aluminium click frames are hung using the adapter fitted on the back. The silver anodised upright in combination with the steel base powder coated silver similar to RAL 9006 form the framework.

Version: 2-sided; Insert size: A1 (594 x 841 mm);
Orientation: portrait; Frame material: aluminium;
Base diameter: 400 mm; Total height: 1800 mm

Divider System

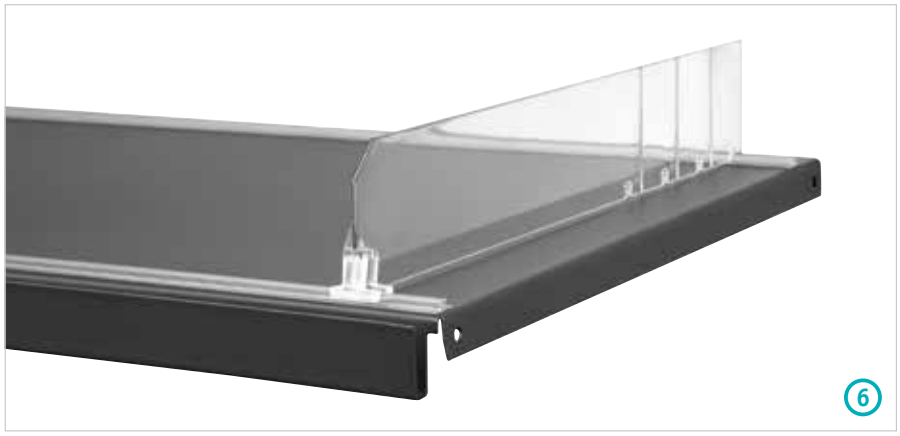

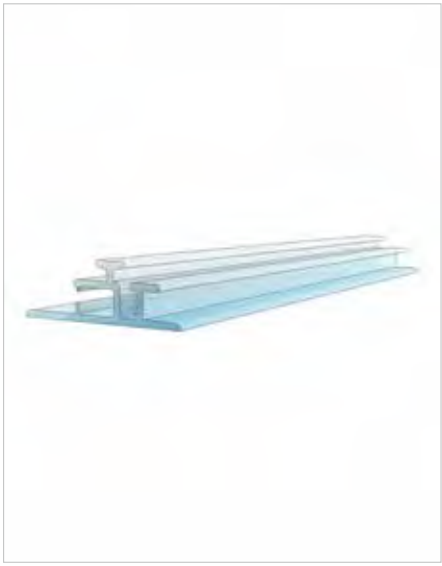

1. **Benefits of using dividers at the point of sale:**
   - **Secure shelf space for a product group.**
   - **Retain fixed shelf facing.**
   - **Customer friendly overview increases sales.**
   - **Product range placement is guaranteed for manufacturer, retailers and customers alike.**
2. **Shelf edge strips e.g. LSP 26, LSP 39, DBR/MSP 26, GLS/MSP 26 or alternatively just the PEK anchor profile.**
3. **Clip the dividers on to the front profile and adjust their length.**
4. **Dividers with break points can be snapped off at the desired length to fit the shelves.**
5. **Use divider profile PEK or PEK 30 or with the "MP" range dividers PEK 25 or PEK 45. Remove the backing from the adhesive tape (optional, not imperative).**
6. **Position the PEK profile and clip the dividers on.**

Current prices can be found on our website.

22.0052.

Current prices can be found on our website.

The pusher for round products

The Twin-Pusher is the ideal stock pusher system for smooth and round products such as drinks cans, spice jars, shampoo bottles, creams and deodorants. With standard pushers, round products often don't stay in order when pushed forward and are pushed to the side, so that the dividers are displaced. The Twin-Pusher eliminates excatly this problem as the divider is fixed to the pusher. Your product stays in line. The result is and orderly and well divided sales shelf – a shelf that fulfils the expectations of the customer.

Narrow products such as drinks cans or wide products such as shampoo bottles can be puched forwards with the Twin-Pusher system. Individual Twin-Pushers can be connected with the universal adapter so that a wider puching surface is created. Specify the section sizes. The Twin-Pusher is therefore suitable for use with nearly every product in foodstuffs and pharmaceuticals.

Fixing Rail for Twin Pusher System

To slot on to an existing PEK profile or also available with adhesive or magnetic tape;
Bracket width: 40 mm; Colour: grey
22.0342.

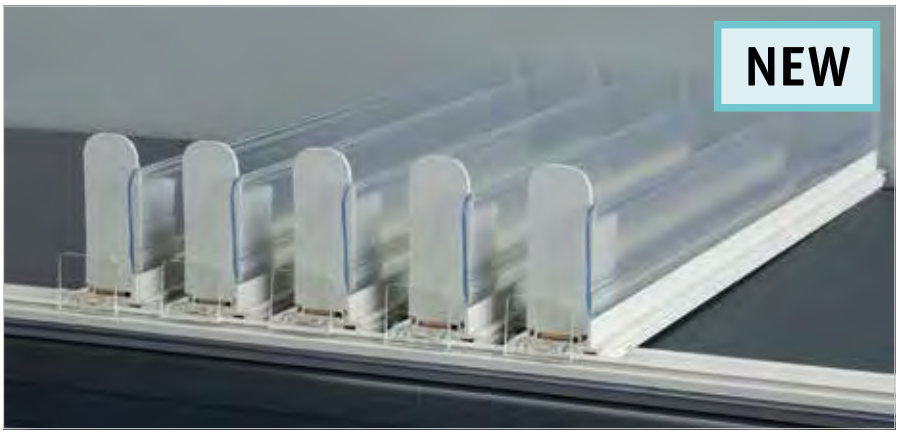

Twin-Pusher right section

20.1983.

Current prices can be found on our website.

"WWT" Shelf Edge Strip

For Wanzl and Wire-Tech wire shelves with 2 horizontal wires; Colour: transparent

"WWT 26"
Holds 26 mm high ticket
20.0269.
"WWT 39"
Holds 39 mm high ticket
20.0104.
"WWT 52"
Holds 52 mm high ticket
20.1024.

"WWTG" Shelf Edge Strip

For Wanzl and Wire-Tech wire shelves; With 2 horizontal wire shelves; Pivoting; Colour: transparent

"WWT-GN 39"
For 39 mm high tickets
20.1994.
"WWTG 52"
Holds 52 mm high ticket
20.0805.

Shelf Edge Profile "TD 39"

For 39 mm high tickets; For Wanzl, Siegel and other wire shelves; Colour: transparent or white
20.1989.

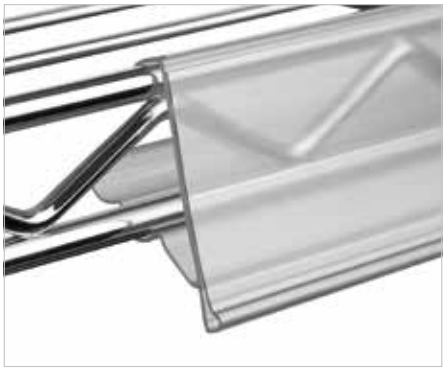

Scanner Profile "MEW"

For Metro wire trolleys; Colour: transparent or white

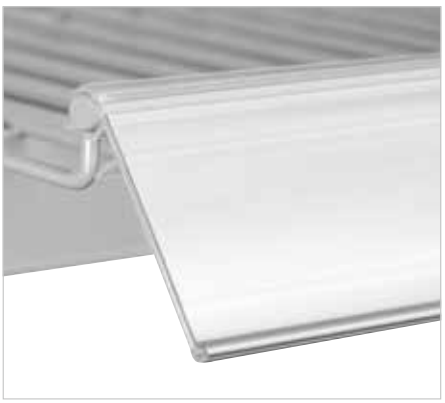

"MEW 32"
Holds 32 mm high ticket
20.0106.
"MEW 39"
Holds 39 mm high ticket
20.1204.

Coloured profiles on request.

Other formats can be found at www.vkf-renzel.com!

Scanner Profile "TK"

For wire baskets with 5-6 mm diameter wire; Reading angle: 5°; Colour: transparent or white

"TK 26"
Holds 26 mm high ticket
20.0107.
"TK 39"
Holds 39 mm high ticket
20.0108.

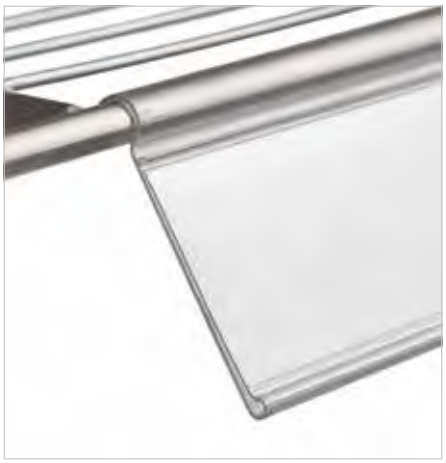

Scanner Profile "CC 39"

For 39 mm high tickets; For refrigerator grid shelves; with cutout holes and clips (22.0034.1); Colour: transparent
20.0109.

Clips are on page 227.

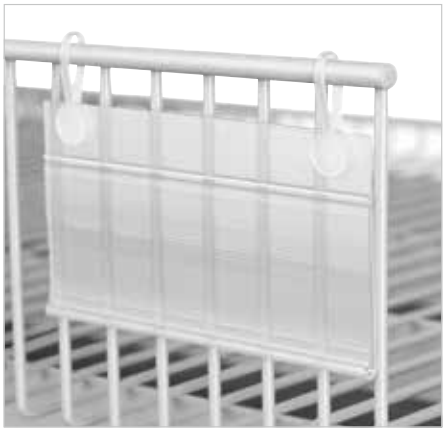

"DRA" Shelf Edge Strip

For wire rails; Colour: transparent

"DRA 26"
Holds 26 mm high ticket
20.0110.
"DRA 30"
For 30 mm high tickets
20.0795.
"DRA 39"
Holds 39 mm high ticket
20.0207.
"DRA 52"
Holds 52 mm high ticket
20.0112.

Scanner Profile "DBH"

Perforated; Attach with clips (24.0048.4) to baskets, wire shelves and wire dump bin; In required size; Colour: transparent or white

holds 26 mm high ticket
20.0113.
Holds 39 mm high ticket
20.0114.
Holds 52 mm high ticket
20.0802.

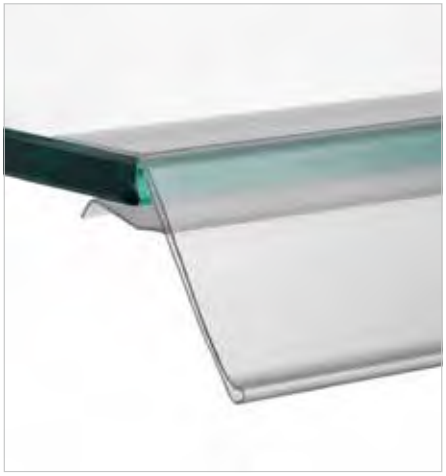

Current prices can be found on our website.

"GLS" Shelf Edge Strip

For 5-10 mm thick glass and wooden shelves; Colour: transparent or white

"GLS 26"
Holds 26 mm high ticket
20.0115.

Shelf Edge Profile Range "FR"

At our site in France we produce the shelf edge profile range "FR" using a unique machinery and tooling concept. Using an innovative and novel folding process, shelf edge profiles can be manufactured from anti-reflective or clear sheet material directly from the roll. Generally we work with the well-tested material PVC. For larger orders we materials such as PET or PLA are used. Other advantages are the low tooling costs, the adaptability to any size of ticket and the quick turnaround. Every profile can be printed all over and/or have a promotional print applied. There are many models available. Please ask!

Scanner Profile "ZD 40"

Universal stick-on profile; can be made in different colours and tickets sizes; Ask for a quote!

Insert height: 39 mm; Version: pack of 100 pieces

Colour: transparent; Length: 1330 mm

More than just a profile!

VKF Renzel GmbH offers the option to extrude tri and quad extrusons alongside the usual mono and co-extrusions.

We hold over 300 different shelf edge profiles and technical profiles in stock made from materials such as PVC, PET, PC, TPE and wood or fibreglass or a combination of these.

Alongside the stablished plastics we are working more and more with new materials. We are making profiles in bioplastics (PLA) and recycled materials to supply the increasing demand for alternatives. A particular highlight are the profiles with LED technology to bring light to your display.

As a manufacturer we have all processes under one roof. From development of new profiles, assembly of different items to finishing of profiles with custom printing, we can react to your requirements.

Benefit from our experience. Our profiles guarantee a fixed place on the shelf to bring your product range to the forefront.

1. *Profiles in wood and fibreglass.*
2. *Profiles with ticket insert or individual print.*

Poster Profiles

Our poster profiles in aluminium are suited to the hanging display of product information and pricing through e.g. posters, pricing boards, etc.

They are easy and quick to install using a wide range of accessories such as hanging hooks, end caps, connectors, etc. allowing them to be used in a variety of positions.

The aluminium profiles are available in standard lengths and can also be cut to size to suit your requirements.

Poster Rail "Hook"

This new generation of pricing display centres around a modern style of poster rail:

- modern and innovative design with easy assembly
- quick, manual exchange of price and information display without any additional tools
- cost-effective poster pockets available as an accessory in standard paper sizes as well as bespoke sizes

The poster rail "Hook" can be used in food, drinks and hardware shops as well as indoor areas in garden centres. This lightweight rail system is hung from the ceiling using a range of different fixings. The optimum length of rail can be achieved using connectors. The highlight of the system is the installation of posters. The rail is loaded using the corresponding poster pockets. These can be hung in place manually or using a grabber for higher locations. No other tools are required. For optimum positioning the poster pocket can be slid along the channel. To change posters, the poster pockets can simply be removed from the channel to exchange the insert as required.

Shelf Barker Pockets

With policy 2010/30/EU on 19th May 2010, the European Union decided on a new regulation for the labelling of products with energy consumption figures. To implement the policy, acts were delegated to precisely and bindingly manage individual product groups.

- **EU 1059/2010 Dishwashers**
- **EU 1060/2010 Domestic refrigeration appliances**
- **EU 1061/2010 Washing machines**
- **EU 1062/2010 Televisions**
- **EU 626/2012 Tumble driers**
- **EU 874/2012 Bulbs and lighting**
- **EU 665/2013 Vacuum cleaners**
- **EU 811/2013 Room heating appliances**
- **EU 812/2013 Water heaters**
- **EU 518/2015 Representing energy efficiency in the internet**

Among other things, the regulations govern the size and design of signs for indicating energy efficiency. Our pockets for the various ranges correspond with the requirements of the EU regulation. Need another size? As a manufcaturer we are happy to help with this.

On request we can also weld rigid PVC!

We offer customised embossing and printing on the price pockets und bedrucken (e.g. with your company name). Ask for a quote!

Current prices can be found on our website.

Shelf Barkers

| Printed Shelf Barkers | Bespoke Shelf Barkers |
| Shelf Barker Clips | Promotional Shelf Risers |
| Framed Shelf Barkers

6

Shelf barkers brighten up your store, which creates more interest from your customers.

They draw your customers' attention to bargains, promotions and new products.

We offer a wide range of shelf barkers. Wecan manufacture almost any shape and colour for you.

Whether it's offset, screen or digital printing, we have the right technique for every order!

Please call or email us with your requirements.

Current prices can be found on our website.

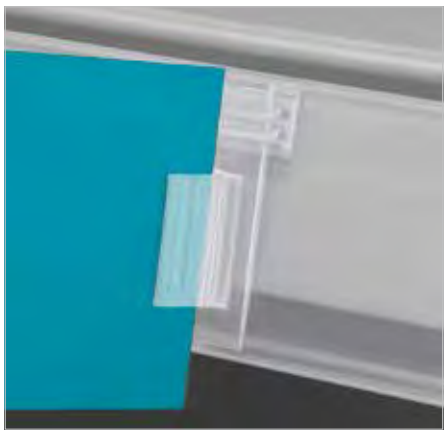

1. *"Relief Shelf Wobblers"*
   These shelf barkers are thermoformed, creating an image in relief to "heighten" interest at the point of sale.
2. *"Hologram Shelf Wobblers"*
   Display two or more images on the same shelf barker with the "Hologram Shelf Wobbler" and create more interest in your product. The images change with the viewing angle or as the wobbler moves.
3. *"POS Info-Rollo"*
   A great opportunity to display additional product information in a minimal amount of space. There are 3 standard sizes to choose from. Tailor the POS Rollo-Info to meet your individual requirements.

Send us your requirements.
Nearly any shape is possible.
We would be happy to advise you!

FlexiSlot® Production

Our unique FlexiSlot product range is a modular plastic slatwall system and offers many options for product display. Alongside a wide standard range we can also offer bespoke products through our in-house production. In our modern workshop we guarantee the highest quality and a quick turnaround. Use our FelsiSlot system to create your sales room or exhibition stand and add to it with our wide range of accessories.

Design it yourself or ask us for advice.

1. *Other RAL colours available on orders of 500 m or more.*
2. *Th FlexiSlot slatwall system can become the creative element of your sales room or exhibition stand with the optional addition of digital printing. This process works by applying a digitally printed vinyl. The channels in the FlexiSlot profile remain and can be fitted with slatwall accessories from our extensive range.*
3. *The pictured colours are available for all FlexiSlot products. The exact colours can be found on page 473.*

Floorstanding Displays

FlexiSlot®-Display "Construct-Straight"

This 1-sided slatwall display in combination with our wide range of accessories is ideally suited to displaying your products. In this way it can be set up in many configurations. Through the plastic slatwall profiles in the colour of your choice (from the selection provided) a macth to your company design can be achieved. The delicate, silver anodised aluminium frame rounds off the high quality look. The bases which screw on at the sides provide stability to the display.

Version: 1-sided; FlexiSlot colour: light grey similar to RAL 7035; Material of base: steel; Colour of base: silver similar to RAL 9006; Width: 600 mm; Height: 1800 mm; Depth: 450 mm

51.0217.19

1. *The white back panel can also be printed according to your requirements if desired!*
2. *Available in many colours of profile: visit our online shop!*

Also available in special sizes made in our in-house production facility.

FlexiSlot® Display "Construct Slant"

This display in the light but strong "Construct" profile can be collapsed for transport. The FlexiSlot tile is angled. The silver anodised components give the display a high quality appearance.

Version: 1-sided; FlexiSlot colour: traffic grey similar to RAL 7004; Width: 600 mm; Height: 1600 mm; Depth: 775 mm

51.0217.1

1. *As a result of the way this display is manufactured the surface is angled differently. Please be aware of this when selecting accessories. Recommended accessory: 60.0423.3 (see page 493).*
2. *Available in many colours of profile: visit our online shop!*

Current prices can be found on our website.

FlexiSlot® Mid-Room Display "Construct Z"

This 2-sided slatwall display provides lots of display space in a small footprint. The z-shape offers a good overview of your products. The silver anodised aluminium frame profile supports the straight line look. The grey plastic connectors mean there are not sharp edged corners.

FlexiSlot colour: traffic white, similar to RAL 9016;
Total width: 1000 mm; Total height: 1300 mm;
Total depth: 780 mm

51.0286.3

1. *Available in many colours of profile: visit our online shop!*
2. *Please note that the height at which the channel of the FlexiSlot slatwall system sits can vary (height difference: approx. 25 mm).*

Other formats can be found at www.vkf-renzel.com!

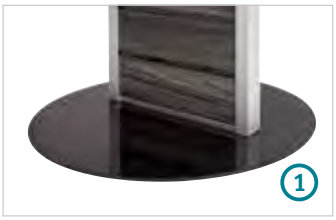

FlexiSlot® Tower "Slim"

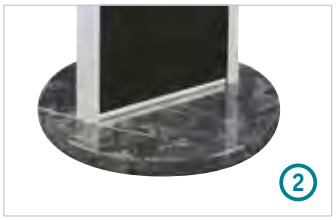

Thanks to the narrow construction this double-sided slatwall display can show off your products using only a small footprint. The plastic FlexiSlot profile is covered on the sides with a silver anodised aluminium profile.

Version: 2-sided; FlexiSlot colour: magenta similar to RAL 3004;
Width: 255 mm; Useable FlexiSlot width: 215 mm;
Material of base: steel; Colour of base: silver similar to RAL 9006;
Base diameter: 400 mm

Height: 1830 mm; Rotating fixture: no
51.0038.84
Height: 1840 mm; Rotating fixture: yes
51.0038.238

1. *Also available with a black powder coated steel base!*
2. *Available in our online shop with marble base.*
3. *Available in many colours of profile: visit our online shop!*

Mobile FlexiSlot® Tower "Slim"

Doublesided "Slim" tower made from plastic slatwall profile;
The orners are covered with a silver anodised aluminium profile;
Thanks to the strong steel base including 4 castors with brakes, this display has many possible applications;

Version: 2-sided; FlexiSlot colour: stone effect; Width: 500 mm;
Useable FlexiSlot width: 460 mm; Height: 1330mm;
Colour of base: black similar to RAL 9005; Size of base: 500 x 500 mm
51.0038.41

1. *Available in many colours of profile: visit our online shop!*
2. *Extension option with header board made from Insert Frame "Multi". The bases are also available in RAL colours.*

Current prices can be found on our website.

FlexiSlot® Tower "Construct Slim"

This slatwall display has plenty of space on both sides to display your products. The frame in silver anodised aluminium profile "Construct" is held together with plastic corner connectors. The powder coated steel bases screw on at the sides. The frame profile can have slits cut in to it to add a header board or panels at the sides. Please ask for a quote on printing.

Version: 2-sided; FlexiSlot colour: traffic white, similar to RAL 9016;
Width: 500 mm; Useable FlexiSlot width: 430 mm;
Height: 1800 mm; Depth: 450 mm

51.0238.57

FlexiSlot® Exhibition System "Quattro"

These FlexiSlot Quattro components designed to fit an exhibition stand of 4000 x 3000 mm (W x D) illustrate the versatility of the FlexiSlot slatwall system. The components used are additionally fitted with slot on header boards of 300 and 800 mm in height where the 800 mm version acts as an eyecatcher over the built-in exhibition cabinet. The header boards can be custom printed on request. Furthermore, the 4 bright halogen spotlights can be easily attached to the header boards. This system affords you an uncomplicated and quick build up and break down at exhibitions and offers you a wide range of slatwall accessories for versatle display of your products.

FlexiSlot colour: pure white similar to RAL 9010;
Total width: 3930 mm; Total height: 3000 mm;
Total depth: 2900 mm

NEW

RECYCLED

Shopping Basket made from recycled Material

You would hardly believe that our shopping baskets start off as waste plastic! In view of the dwindling raw materials we are looking for new solutions for environmentally products. With our shopping basket you are saving raw materials and preserving sustainable resources. The plastic used in the manufacture of these is 100% recycled polyproylene and doesn't use crude oil. As the basket can also be completely recycled the material life cycle is repeated.

Capacity: 20 l; Material: recyclate (Systalen Primus);
Width: 300 mm; Height: 225 mm; Length: 430 mm;
Number of handles: 1; Colour of handle: grey; Version: standard

Finding the right mirror diameter

1. Determine the distance between you and the mirror.
2. Determine the distance between the mirror and the person to be seen
3. Add both distances together.
4. In the column A+B find the corresponding distance in metres. In the next field you will find the mirror diameter options. The darker the field the better the view.

Lighting for Promotional Tent

The LED lighting, consisting of 4 LED strips each 15 Watt, makes a great atmosphere in your folding tent. In only a short time the LED lighting is attached to the tent structure. The advantage: it can remain attached when you dismantle the tent but not for transport. The LED lights can also be dimmed to change the mood.

Fixing: with hanging clip; Power input [W]: 4x 15 W

Beachflags in different shapes and sizes

Outdoors beachflags are one of the most loved promotional tools as they quickly grab the attention of visitors due to their size and shape. Seen already from a distance, beachflags are often used as an eyecatcher at events, festivals, exhibitions, large conferences or shopping centres and pedestrian areas. They attract attention with their streamlined design. Printed with a corporate design, logo and/or a company slogan, they are the most noticeable part of any outdoor campaign. Whether teardrop shaped, rectangular or square, beachflags are the ideal platform for your promotion.

EasyCube Set "Profi"

One set - many possibilities. Become a showcase designer yourself and start creating! Our EasyCube Set "Profi" consists of 32 individual parts and thus offers numerous design options for you. Design advertising platforms in a variety of configurations. Change the 16 individual cubes to suit your ideas. Create columns, stairs or other surfaces to present your products simply by plugging them into each other. To achieve high stability, place the cubes on the black "Floor" tiles. 2 connectors per tile will help you to connect tiles to each other. On the 8 white "Cover" tiles you can display not only fashion, but also cosmetics or sporting goods attractively and safely.

PIXLIP GO – The MOBILE presentation system made from plastic

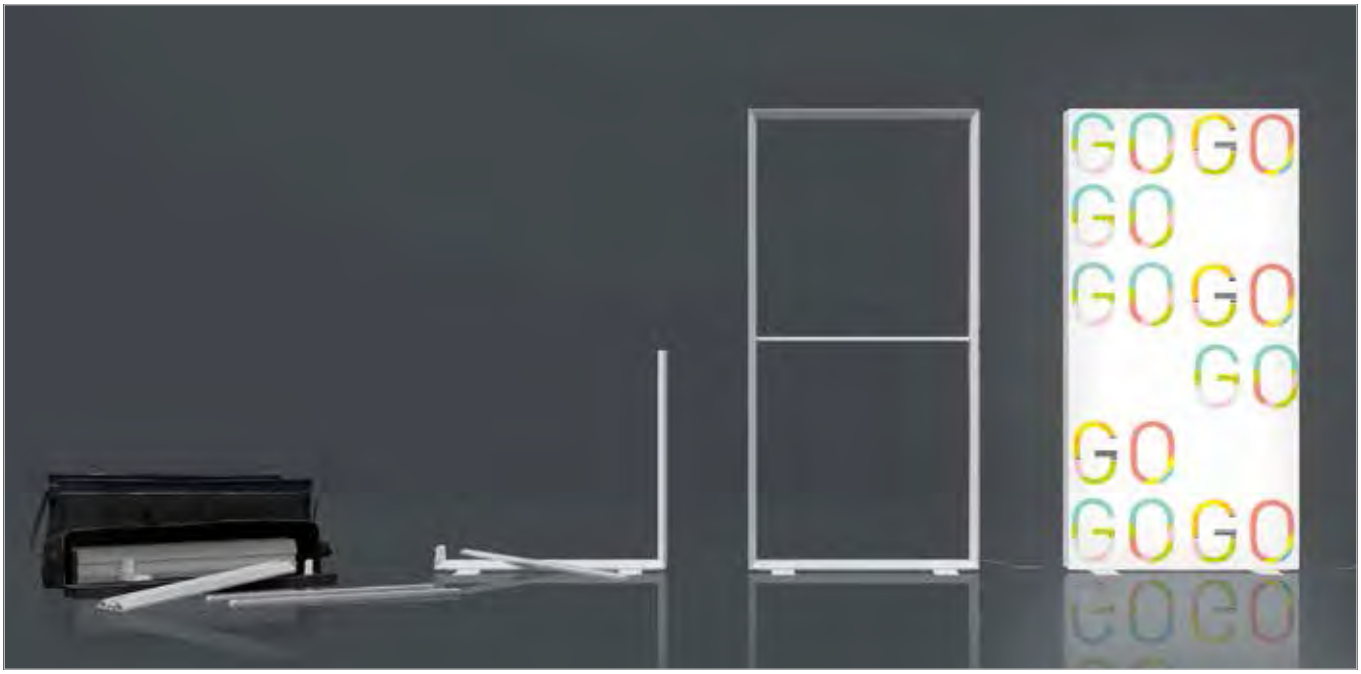

PIXLIP GO is the first mobile, illuminated display system in plastic. PIXLIP GO is based on a frame construction with built-in LED modules and textile prints suitable for backlighting (optional extras).

The modular concept offers different frame heights and a range of practical extensions.
It can also be attached to other frames to make entire exhibition stands.

The customisable printed fabric banners make each PIXLIP GO unique: always something new.
If your offer changes, the banner can be changed too.

Advantages:

- **BRIGHT:** the highly efficient LED modules guarantee a homogenous light and draw attention.
- **QUICK:** the intelligent and intuitive slot system means all parts can be connected in a few minutes and without tools.
- **LIGHT** to transport: the plastic construction of PIXLIP GO is particularly lightweight - and even convenient to transport in the carry bag included. PIXLIP GO fits in any car boot!

Other formats can be found at www.vkf-renzel.com!

PIXLIP GO Counter
Printed front and back

With a height of 1000 mm this counter offers a relaxing working height. The 400 mm deep tabletop offers plenty of space to e.g. display promotional materials. Used at exhibitions, the counter offers a central point and room for discussions and exchange of information. Delivery includes transport bag.

Material: ABS; Profile colour: white; Size: 1000 x 1000 mm (W x H);
Illumination: LED module; Print: front and back printed;
Fire safety class: plastic fire protection classification V0;
Finish: with worktop; Features: with base plates
10.0369.6

PIXLIP GO Counter L
Printed front and back

The new PIXLIP GO Counter L offers a practical extra to the standard PIXLIP GO Counter: the small counter has a bigger footprint, is more stable and has more storage space. 2 shelves in the back offer plenty of space for your leaflets, etc. The parts can be assembled and dismantled very easily.

Material: ABS; Profile colour: white; Size: 1000 x 1000 mm (W x H);
Illumination: LED module; Power input [W]: 23 W;
Print: front and back printed; Version: with counter top and shelf;
Fire safety class: plastic fire protection classification V0;
Finish: with 400 mm deep tabletop; Features: with base plates
10.0369.22

Also available as a retrofit kit for existing counters!

Current prices can be found on our website.

PIXLIP GO Lightbox

The Lightbox 1015 is the smallest available frame size without a function as a counter. With a height of 1500 mm it is designed above all as a classic eyecatcher and to draw attention at the point of sale. As an element of a larger exhibition stand it often serves as a visual and spatial partition. The overall view is opened up. Delivery includes transport bag.

Material: ABS; Profile colour: white; Illumination: LED module; Fire safety class: plastic fire protection classification V0; Features: with base plates

Exhibition Wall "ISOframe"

ISOframe is the first complete flexible banner system. The posts are connected with the patented Flexi-profiles and can be bent up to 180 degrees in either direction. As a result every graphics panel can be used convex or concave. The system is very sturdy. There are almost no limits thanks to the flexible profiles. You can even add monitors, shelves, table. etc. using additional connectors. The click system allows easy connection of individual modules. To begin with the base module is attached to the two feet. You then have the option to add extra modules to create an exhibition wall of any width. Easch module is 800 mm wide and 2290 mm tall making it ideal for any exhibition stand, large or small.

Material: aluminium; Width: 800 mm; Height: 2290mm;
Print: incl. digitally printed banner

Version: basic module, 2 bases
80.0864.17
Version: extension module, 1 base

Exhibition Wall Expand "GrandFabric"

An event and exhibition system which makes your brand the centre of attention. With the Expand "GrandFabric" you can create different mobile exhibition stand combinations in next to no time. Perfect for quick setup at exhibitions, for promotions and recruitment drives as well as for many other events where you have a particular target group.

Flexible and easy to transport.
Thanks to the lightweight aluminium construction and the high quality textile cover, the system is modular and portable.
The sublimation print is of a high resolution and offers the possibility to display your message in two directions (doublesided).
The wall-mounted unit is available in different sizes and shapes (straight or curved).

Connect the different display walls and create your own exhibition stand. Combine with a storage room and add accessories such as lighting or shelving. Everything fits in a car. Perfectly suited for larger trade shows and smaller promotional events in shopping centres.

Pop-Up System "Stretch"

From a small bag to a large advert. Pop-Up systems are ideal for exhibitions, conferences and one-off events.
Easy to build, easy to dismantle and handy to stow.

The pop-up system "Stretch" consists of a pop-up framework with a Keder frame surround. These are both stowed in two wheeled carry bags to make transportation easier. The textile prints are fitted with a silicone Keder surround making them easy to apply. As the tetxiles are attache to the frame under high tension the picture will be crease-free. The system is available in 5 differerent widths and 2 different heights. Included are the framework as well as the digitally printed panels for the front and sides. With the help of connectors (see accessories) systems can be combined with one another. Tis offers many possibilities for exhibition stands. On request the pop-up system "Stretch" can be fitted with lighting and bases (see accessories).

In addition the pop-up system can be fitted with full backlighting and become an optical highlight of your event. Please ask us for a quote!

Pop-Up System "Style"

The pop-up display "style" has a great price:performance ratio and is really easy to assmble! It has a sturdy scissor frame made from aluminium which simply pulls apart and stands self-supported. The two halogen spotlights hang on the cross using an adapter and light the display. To attach the graphics panels, the magnetic rails are attached to the magnetic points on the folding frame. Next the digitally printed panels are attached. It can therefore be assembled by one person and doesn't require any tools to do so.

Height: 2200 mm; Depth: 450 mm;
Features 2: incl. readymade panels;
Illumination: 2 halogen spotlights;
Print: digital print

Width: 2600 mm; Features: 18 magnetic rails; Version: 9 panels
80.0610.13

Width: 3250 mm; Features: 21 magnetic rails; Version: 12 panels
80.0610.14

Roll Banner "XL"

This roll banner is designed as a background display for company logos, pictures, marketing offers, information at trade exhibitions, AGMs, press conferences, shopping centres, etc. Simply open the feet, slot the rod in to the hole, tip the display and slowly pull out the banner. Then just slot the metal hook in to the rod. You can create an even bigger backdrop by joining 2 or more displays with the magnetic connectors attached. These can be found in the top profile. The print is flame retardant (B1) and UV-stable.
On request we can also print on other materials.
The bag is included; Weight 7.3 kg;

Width: 1200 mm; Casing material: aluminium;
Print method: digital print

Banner Display "Magnetico"

Display and banner are an inseparable team!
A single or doublesided banner is the perfect way to display information.The banner display "Magnetico" has a silver anodised aluminium base.

The particular highlight of this banner set is the magnetic attachment of the banner. The banner is fitted top and bottom with a magnetic rail and can simply and quickly be attached. This makes changing banners in showrooms, at exhibitions, in salesrooms much easier.

The corresponding banner to the display "Magnetico" is included int eh set. Choose a digital print in the corresponding size for your promotion.

With the corresponding pocket the display set "Magnetico" is ready to go anywhere. (see accessories)

As the perfect accessory we recommend the 2 part acrylic leaflet holder: simply clamp the banner between the two parts. The 4 magnets hold the leaflet holder firm to the banner.

Banner Display "Combi“

The Banner Display "Combi" offers you different possibilities to display your promotion. The system is very lightweight thanks to its aluminium construction but stands very stably on 4 adjustable feet. In a short time the system can be put together, the banner attached and be ready to display. The digitally printed banner can be attached using 4 springs inside the frame. This also offers the option to attach a second banner on the other side. Alternatively a cover printed on both sides can be slid over the system.
The framework then disappears benetah the cover.

Round Column "Curly"

The round column "Curly" can be used as a mobile showcase, promotional column or a combination of the two. It has a light and strong aluminium structure. The column has 3 acrylic shelves which are lit by LEDs in the upper ring. 16 transparent and exchangeable films are included. No tools required for assembly as the column is quickly and simply twisted up and down. The column is protected by the padded transport bag. It looks well combined with pop-up systems, roll banners or banner displays. With the round column "Curly" you will get high quality at a low price.

Advertising Column "Air"

This silent promotional column is ideal for advertising special offers, events, services or for product promotion. Its classy appearance predestines it for use at exhibitions, at the point of sale, in foyers, bars, restaurants, clubs, at receptions, galas, weddings, … there are practically no limits. The high quality digital print gives a good impression. The print is UV-resistant, scratchproof and abrasion resistant and easy to clean if necessary. The promotional column is easy to dismantle. This makes it easy to transport and means it requires very little storage space when not in use.

Material: PVC; Material of base: ABS;
Promotional panel material: terylene 80 g/m²;
Diameter: 450 mm; Height: 2360 mm;
Print: with Digital Print; Accessories: incl. handpump
80.0931.1

Banner Display "Bannerbow"

The banner display to bring a three dimensional element indoors!
The banner display "Bannerbow" is a customisable alternative to well-known roll banners and banner displays. The system is designed to attract attention to your promotion or exhibition stand.
Achieve a totally new effect in that you can combine several displays. Position these offset from one another or in a row.
This gives you the opportunity to create a tunnel with several "Bannerbows" and to frame your exhibition walls and counters.
Choose the corresponding banenr wdith from our range.
You can also have the "Bannerbow" printed on both sides.
The system can be assembled by one or two people within minutes and without tools. The banner display "Bannerbow - Indoor" can be stored in a carry bag for practical transportation. Included in the delivery are two slot together fbreglass poles, three short crossbars, the printed banner and two bases in ABS plastic.

Frame material: fibreglass; Foot material: aluminium;
Colour of base: black; Depth: 1000 mm;

Banner Display "Backdrop"

Freestanding, the "Backdrop" creates a promotional wall.
In conjunction with the "Bannerbow" you create the perfect, portable exhibition stand for any occasion.

For a freestanding "Backdrop" the version with feet is required. If you already have a "Bannerbow" in use then you can order the "Backdrop" without feet and attach it to the existing "Bannerbow" with the aid of adapters (found under accessories).

The display consists of a flexible fibreglass pole which slots in to the aluminium feet. The printed banner (printed one side, white on the other) is then slid over the curved pole like a cover. The "Bannerbow" and the "Backdrop" poles are slid in to the adapter. Then the banner is slid over the fibreglass pole and attached to the "Bannerbox" with hook and loop tape strips.

Frame material: fibreglass; Cover material: fabric banner; Width: 3000 mm; Height: 2350mm; Print: digital print on flag material 110g/m²; Version: one-sided; Range of use: indoor

Foot material: aluminium; Colour of base: black; Depth: 150 mm; Weight: 14.5 kg; Features: incl. transport bag
80.1064.4

Outdoor Banner Display "Bannerbow"

With this new banner display you bring a three dimensional element to any outdoor event! The display "Bannerbow" is the perfect alternative to the usual roll banners and banner displays. Use this banner display at outdoor events such as festivals or village fairs thanks to its weatherproof properties. With this bannerbow you are guaranteed to be seen from afar! The "Bannerbow" is very versatile. Split your print across several "Bannerbows" and create a brand new effect. Placed one behind the other a tunnel is created. Or make an arch under which to feature an exhibition wall and counters. Your creativity is unlimited! The whole system can be assembled by one or two people within a few minutes and without any tools. A further advantage is that it is lightweight to transport. Included are two slot together fibreglass rods, 3 short crossbard, the printed banner and two strong bases. All components are stored in a transport box.

Frame material: fibreglass; Foot material: steel, powdercoated black; Depth: 1000 mm; Features: incl. transport trolley;
Range of use: outdoor; Accessories: incl. 2 steel bases, each 10.0 kg

VKF Renzel GmbH • Im Geer 15 • 46419 Isselburg • Germany

Universal Table "Practical"

The original design of this practical table means that it can be stored and transported using the least amount of space. When in use, it can be set to two different heights: a) with one 720 mm pole as a table to sit at, b) with 2 poles with total height of 1200 mm as a bistro table to stand at. The poles that are not required, are held tidily in a bracket under the tabletop. The table has chrome plated poles, a sturdy powder coated metal welded base and a Werzalit tabletop (diameter: 700 mm). Despite its sturdiness, it only weighs 13.5 kg, is easy to move and no tools are required for assembly.

80.0155.1

"Practical" Holder on Wheels

For up to 6 universal tables "Practical" (80.0155.1).
Strong tubular construction, fitted with 2 fixed castors and 2 castors with brakes;

Diameter: approx. 800 mm; Height: 1570 mm

80.0156.1

Ideal for use in catering or at parties, exhibitions and other events.

Other colours of tabletop and base available on request.

Bistro Table "MIURA"

Alongside the "MIURA" stools, use the bistro table of the same name for a modern look at exhibitions. The design by Konstantin Grcic embodies timeless elegance with modrn purism.
The round MDF panel and the strong aluminium base don't just unify in colour. The bistro table "MIURA" gets its character from its three footed frame. A narrow aluminium tube runs from the tabletop straight down and opens to a steady frame. This solution with 3 feet prevents wobbling. Additionally the surface beneath is protected by a plastic pad. Whether at a café and bistro, exhibition, salesroom or home – the interesting three legged table makes an impression everywhere. Thanks to its tough material the bar table "MIURA" can also be used outdoors. Whether your next promotion is indoors or out, your "MIURA" table can play a part. At the end of the event or when the shop shuts, the tabletop folds away to the side so that several tables can be stacked next to one another in a small space.

Material of table top: MDF 25mm thick;
Material of stand: aluminium; Diameter: 700 mm;
Total height: 1080 mm; Version: foldable;
Features: incl. plastic slider

Barstool "MIURA" designed by Konstantin Grcic

With this barstool from Konstantin Grcic, there is nothing that is not innovative. A normal barstool in contrast is a collection of components and materials. "MIURA" is one. And that's not just any old material: reinforced injection moulded polypropylene is lightweight, strong and equally important, inexpensive. With the unique, angled and at first glance seemingly uncomfortable shape, "MIURA" is a star in the provoking work of Konstantin Grcic, a man whose world of ideas has inspired his design colleagues. In contrast to many others it is not just about shape for Grcic: the chair is wonderfully comfortable, stackable and in addition can be used inside and out.

Material: polypropylene; Width: 470 mm;
Total height: 810 mm; Height of seat: 780 mm;
Depth: 400 mm; Load capacity: up to max. 200.0 kg

Logo Bench

The logo bench can be printed all over on both sides and makes for a clear improvement in brand visibility at events or the point of sale. With the 90 degree angle of the back rest the advert is better displayed than on other promotional items such as deck chairs or bean bags. The logo bench offers the possibility to advertise on a large scale at events without further budgets. In addition the logo bench is extremely mobile, ultra light, space saving and can be assembled in 10 second without additional tools. 2 people can sit on the bench. Can be used indoors or out with waterproof covers that can be changed at any time.

Frame material: steel; Surface material: B1, Lotus fabric (flame-retardant und waterproof); Width: 1120 mm; Height: 860 mm; Depth: 530 mm; Weight: 7.2 kg; Print: full face sublimation print, double-sided; Accessories: incl. non-woven transport bag

Example of use

Naxpro Truss - Quality has a name

Today traverse systems play an important role in construction, as well as in the traditional uses such as discos and concerts, in exhibitions and shopfitting, event management, promotions and in commercial building. As our 1, 2, 3 and 4 point traverses wil withstand high loads in most cases, the safety and quality of our product is at the forefront. Through analysis, TÜV approval and annual checks of workstations, we guarantee our customers a consistent quality of product. These comply with the current standard Norm EN 1090 (formally DIN 4113). For the most part, hand finished components, quick lead times, high quality, a range of products and above all our reliable staff make Naxpro Truss traverses exactly what they are: traverses of the highest standards.

Bring colour in to play! We will make your exhibition stand unique!
Name your RAL colour and we will create a quotation for you.

Other formats can be found at www.vkf-renzel.com!

Gantry Profile "Naxpro Truss" FD 21

Traverse system with single point connection,whose strengths are its light weight, small size and flexibility. FD 21 traverses can be combined with all components of the Naxpro Truss systems FD 22, FD 23 and FD 24 kombiniert and are suitable for use for decorative construction of display holders, geometric shapes such as cubes, promotional frames and ballustrades. Due to the flexibility of the system, uses are nearly unlimited.

with slip ring
10.0015.15

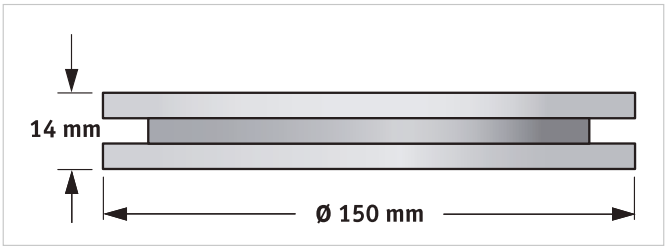

We are pleased to offer our heavy duty turntables with an optional safety package, as requested by most exhibition companies.

Rotating Fixture "Silent"

For the highest standards; 8 large steel spheres guarantee soundless operation under load, self-lubrication and also toguh under low temperatures; Maintenance free; Adheres;

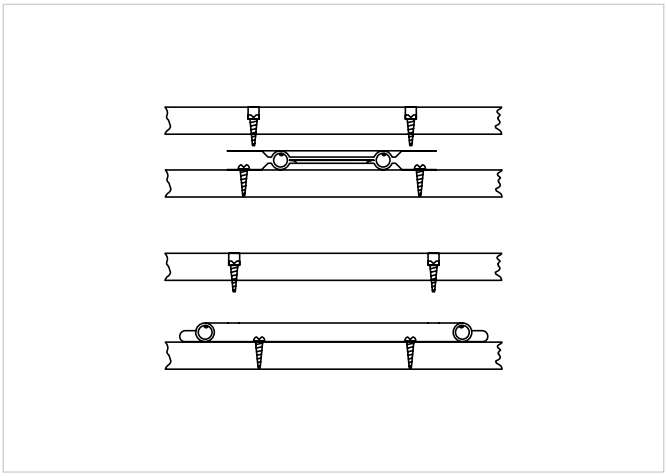

Colour: white; Diameter: 150 mm; Height: 15 mm; Load capacity: 10 kg
10.0064.1

Other formats can be found at www.vkf-renzel.com!

Rotating Fixture "Twister"

Height: 8 mm

Width: 75 mm; Depth: 75 mm; Inner diameter: 32 mm;
Load capacity: 90 kg; Application: for 450mm ø turntable
10.0065.1

Width: 102 mm; Depth: 102 mm; Inner diameter: 55 mm;
Load capacity: 135 kg; Application: for 300 - 600mm ø turntable
10.0065.2

Width: 155 mm; Depth: 155 mm; Inner diameter: 119 mm;
Load capacity: 225 kg; Application: for 400 - 750mm ø turntable
10.0065.3

Outer diameter: 230 mm; Inner diameter: 115 mm;
Load capacity: 330 kg; Application: for 400mm ø turntable
10.0065.4

Outer diameter: 308 mm; Inner diameter: 161 mm;
Load capacity: 450 kg; Application: for 500mm ø turntable
10.0065.5

Assembly instructions:
Two different circular holes allow secure attachment via short self-tapping screws. Choose between flat, sunk, tallow drop or fillister head screws. Or alternatively fix using glue, spot weld, etc. The upper and lower supporting surfaces surrounding the rotator component should remain level. In the event of continuous use, the rotation can be eased by applying a little medium viscosity oil. Dust, dirt and paint chippings can all slow down the smooth action of the rotating element.

Ideal for:
sales stands, book stands, promotional displays, serving areas, television equipment, home and hobby, or industrial use.

Advantages:
Simple to secure, complete units, no components, galvanised steel, hardwearing and more robust than plastic.

Current prices can be found on our website.

Security Technology

1. *The blades are not angled but straight and smooth. This means no risk to your fingers. Our safety scissors are therefore named SECUMAX = highest safety.*
2. *For even better safety both blades have rounded ends. You'd sense a slight prick but wouldn't really injure yourself.*

Sharp, not dangerous. The new scissors from MARTOR

Safety Scissors "SECUMAX 363"

Achieves precision in many areas:
Our safety scissors are great for detailed work. With thumb and index finger they are easy to direct. Ideal for use with card, paper, fabric, cord and strapping.

Cutting length: 56 mm
12.0160.12

1. *Small openings for a strong hold.*
2. *Short blade for exact and detailed cuts.*

Other formats can be found at www.vkf-renzel.com!

Safety Scissors "SECUMAX 564"

Thumbs up – for a long cut.
The "SECUMAX 564" has a particularly long blade. You can not only work in a controlled way but need less cuts to split the material.

Cutting length: 80 mm
12.0160.13

1. *Precise guide thanks to thumb indent.*
2. *Extra long blade for a speedy cut.*

Safety Scissors "SECUMAX 565"

The allrounder at home and work.
Our multitool for professional cutting. Ideal for larger hands – or if you are wearing gloves. The additional wire notch can be used to cut wires and cables, the claw on the handle to open bottles.

Cutting length: 70 mm
12.0160.14

1. *Claw for twisting opening locks.*
2. *Wire cutter specially for wire and cable.*

FLASH.movie PQ 49

4K and Android for the point of sale!

Pictures and videos are nearly as sharp as in reality
using the popular Android operating system.

Thanks to the Ultra HD resolution, support from web and native apps as well as the content management tool "CMND", the possibilities are almost umlimited. Regardless of whether you use one or more devices you have control over them at all times. Set priorities and personalise your content to target groups, for example time dependent, as a method of communication between guests and employees, as a digital menu board or a greeting stand.
In addition the devices offer the possibility to create a cost-effective viedo wall with multiple devices.

Casing material: plastic; Colour: black; Memory type: USB, MicroSD; Playback type: 16:9; Speaker: integrated; Internal memory: 8GB; Resolution: 3840 x 2160 pixels; Touchscreen: no;

FLASH.movie PRO Double Air

Doublesided screen in portrait format for ceiling hanging with 2 different brightnesses, where one side offers a brightness of 450 cd/m² and another 700 cd/m² (43") or 800 cd/m² (55"). This makes it ideal for use in an entrance area or display window without having a bright display inside. With an Android operating system, wireless LAN and the software included, content can be displayed from an existing PC without connecting a network cable. It can also be used standalone where the data is loaded from a US to the internal memory. The white casing is suitable for nearly every environment. Fixings for ceiling hanging with steel cables are included in the delivery.

Casing material: metal; Colour: white;
File type: MPEG, MP4, AVI, MOV, JPEG, BMP, MP3, AAC uvm.;
Memory type: USB, HDMI Input; Playback type: 9:16;
Speaker: integrated; Internal memory: 8GB;
Range of use: indoor area; Resolution: 1080 x 1920 pixels;
Connectivity: HDMI, VGA, USB, SD card; Network: LAN, WiFi

Monitor size: 109.5 cm (43"); Width: 635 mm;
Height: 1178 mm; Depth: 23 mm; Weight: 18.0 kg;
Brightness: 700 / 450 cd/m²

89.0002.147

Monitor size: 139.70 cm (55"); Width: 827.4 mm;

Banner Frame "Tension Stand"

Freestanding frame, incl. crank handle for easy banner exchange. Available in many standard formats. Max. frame size 6000 x 3000 mm (W x H)

Frame material: aluminium;
Surface: anodised; Frame colour: silver;
Frame width (outer size): 4000 mm;
Frame height (outer size): 2000 mm;
Frame depth: 96 mm;
Banner size: 3800 x 1800 mm (W x H);
Size of visible area: 3720 x 1720 mm (W x H);
Finish: incl. cable, carabiner and removable handle; Version: display, frame 1-sided, incl. base

15.0263.4

System also available with backlighting.

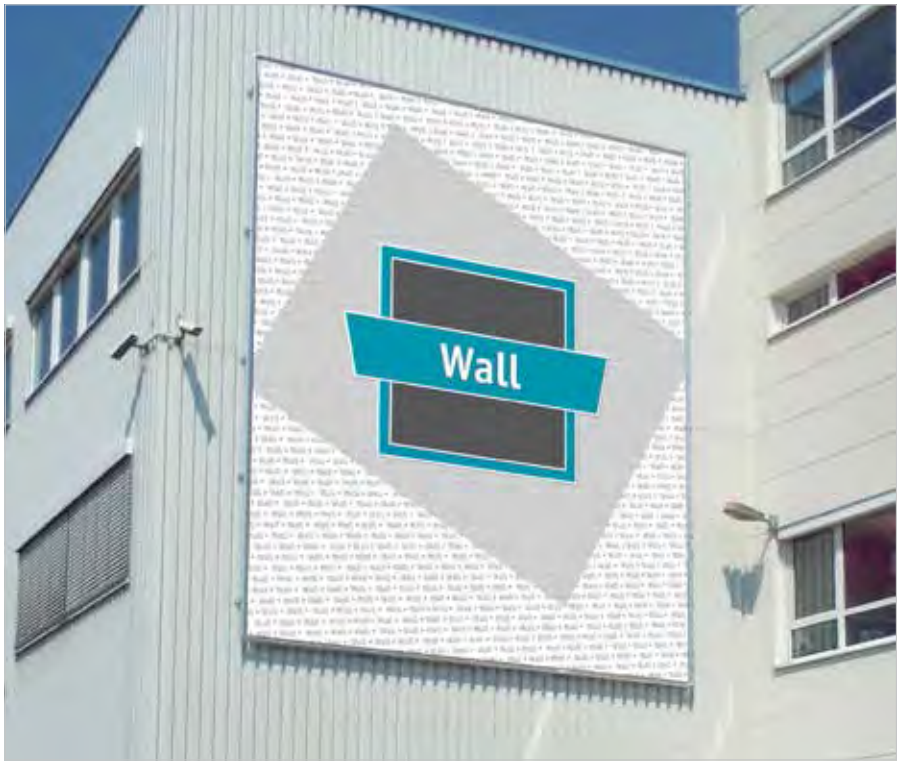

Other formats can be found at www.vkf-renzel.com!

Banner Frame Slot System Aluminium "Wall"

Through the classy design of the aluminium tubes every frontage becomes an eyecatcher. Included are the wall distancers and bungees "Storm" to fit the banner. When assembling you should bear in mind that each wall distancer requires 35 mm of space in addition to the frame size. The systems shown have been created based on structural engineering calculations. Further information about this can be found on our website.

Pole material: aluminium;
Connector material: ABS plastic (impact resistant) / aluminium;
Pole colour: silver anodised, matt;
Frame width (outer size): 3200 m;
Frame height (outer size): 2200 mm;
Banner size: 3000 x 2000 mm (W x H);
Tolerance per wall bracket: + 35 mm;
Tube diameter: 50 mm;
Thickness of wall: 2.5 mm;
Version: incl. 8 wall distancers + bungees

Banner/Flag System for Lamp Posts

This system is available in four versions for specific post diameters and banner sizes / wind loads. All have revolutionary flexible arm technology to prolong the life of the banner and avoid damage to the lamppost. Standard and Metro systems consist of two aluminium bases and two fibreglass brackets. The brackets are made at a 4° angle so that before the banner is fitted the upper arm tilts upwards and the lower arm downwards. Version Airow is for hight wind speeds. The banner and flag systems are designed for solid material, such as Blockout or Frontlit.

Material: fibreglass / aluminium; Bracket length: 750 mm

Diameter: from 120 mm; Promotional panel: max. 750 x 3000 mm (W x H); Version: normal wind load / Standard round
15.0133.1

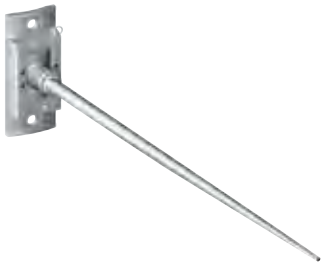

Diameter: from 76 mm; Promotional panel: max. 750 x 2400 mm (W x H); Version: high wind load / Metro Airow;
Features: 1 set = 2 crossbars
15.0133.4

1. Standard Airow

2. Metro Airow

- **Banner not included.**
- **Instructions for banner assembly and use are available.**
- **Corresponding digitally printed banner can be found at www.vkf-renzel.com.**

Steel Bands with Clip

Very flexible and rustproof, the bands are in sets of 4 which is enough to install a BannerFlex system (Standard/Metro). When installing two banners, be sure to account for the extra diameter of the post. Call our sales team to place an order.

Material: stainless steel; Surface: natural; Diameter: 120-140 mm
15.0134.14

Washable Mat with Logo / Doormat / Customised Imprint

The logo mat is printable in 30 basic colors and can be washed at 50 °. The mats are also available on request in special sizes and colors. All mats are produced with a circumferential rubber edge of approx. 2 cm. The PVC-free NBR back prevents the mats from slipping on smooth surfaces. The mat surface is made of polyamide 6.6 and is B1 fire protection certified. In addition to a high dirt trap capacity, it has a water absorption of 3-4 l / m². The weight of the pile is about 750 g / m² and is about 8 mm high. The costs include printing and design costs. A size tolerance of +/- 3% is possible!

Print method: chromo JET

Size: 600 x 850 mm
16.0036.12
Size: 850 x 1150 mm
16.0036.7
Size: 850 x 1500 mm
16.0036.3
Size: 1150 x 1800 mm
16.0036.4

Logo mats can be made in portrait or landscape format.
Special colours also available on request.

The associated colour table can be downloaded from our website.

Promotional Mat incl. Digital Print

The washable promotional mat can be printed with your design. As standard the promotional mats are fitted with a 2 cm wide edging and an anti-slip PVC sole. The velvety, soft upper can absorb liquids and dust. Depending on its location it should last 4-12 months. Prices include print and design costs.

Material: polyamide / rubber vinyl; Material thickness: approx. 6mm; Print method: digital print; Grammage [g/m²]: 350 g/m²; Version: without B1 certificate

Surface: matt; Print method: 4c digital print;
Range of use: for indoor use; Version:
for smooth surfaces, short-term adhesive;
Assembly: sheet cut to size
14.0069.155

1. For flat surfaces

Current prices can be found on our website.

Pavement Sticker

The innovative pavement stickers are made from a coated aluminium film and are therefore very strong but also flexible. The soft base material matches the surface exactly and takes on its shape. The special adhesive on the back clings to the most uneven surfaces. The surface makes it completely anti-slip. The pavement sticker is great for marathons, car parks, petrol stations, service stations and also long-term in the middle of the road or even under water. When your campaign is finished, the aluminium can be recycled making this an environmentally friendly product.

Material: asphalt Alu film, self-adhesive; Version: customised print; Print method: 4-colour digital UV direct print; Print status: 1-sided; Range of use: for indoor and outdoor use; Surface: smooth

Size: 500 x 500 mm

Hot Air Gun for Lettering

This heat gun was specially developed for the professional car wrapper. The brand new heat gun has an adjustable 2200 Watts and 3 settings for air flow: It also has a 7.5 m cable for freedom of movement and can be used with one hand. With soft touch surface. A brush motor with ceramic element is built in to the heat gun for a 40% longer lifespan.

Power input [W]: 2200 W; Voltage [V]: 220 V;
Temperature: 80 - 630 °C, fully adjustable;
Air volume: 150 / 150-300 / 300-500 I/min (3 stage);
Version: soft grip, hanger and 7.5 m cable

17.0058.1

Temperature Scanner for Heat Gun

The scanner can be clipped on to measure the temperature of the working surface while the heat gun is in operation. As soon as the ideal temperature is either exceeded or dropped below a signal sounds. Additionally the screen displays whether the temperature is too high or too low. Red indicates "too hot", green indicates "ideal temperature" and blue indicates "too cold". The tolerance can be adjusted to suit. The visual and audible warning can be deactivated if required.

Power input [W]: 2200 W; Voltage [V]: 9 V battery (included);
Version: temperature detection through light beam
