TRODAT BESTSELLERS **CLIMATE-NEUTRAL.** AS STANDARD.

After the overwhelming success of the Original Printy 4.0, Trodat has extended its range of products which offer climate neutrality as standard, thus maximising the positive impact on the environment. Since 2013, Trodat produces more than 70 of its best-selling products with the maximum, technically possible content of pre- & post-consumer recycled plastic to reduce their CO₂ footprint.

Only in the last step, the remaining, inevitable CO₂ footprint of these products is offset by investing in Gold Standard climate protection projects recommended by the WWF[®]. As a result, Trodat offers its best-selling products climate-neutral, as standard!

TRODAT VIENNA POCKET STAMPS

TRODAT PREMIUM FLASH

With Trodat's Pre-inked Flash lines you get thousands of crisp and clear impressions, whether you use bold logos or fine lines. In addition they can be re-inked easily for thousands more.

Pre-inked stamps are very popular for large impressions, because the housing of the stamps is relatively small even for stamps with a large imprint area. All Trodat Premium Flash models promote dry cartridge inking concepts for efficient inventory management.

Improved Die Box: Cutting and sealing of foam is done by new laser technology. Therefore no space is wasted, resulting in a larger impression area.

Trodat Flash Machine: Quick & easy operation not only foam, but whole die box can be flashed at once.

Convenient Inking: Fast & clean – no accessory or scale needed. The patented dry cartridge concept allows high inventory flexibility. Trodat Premium Ink migrates under 1h.

1-Step Assembly Maxlight: The snap-in die box provides the simplest assembling possible.

1-Step Assembly PSI: The slide-in die box provides the simplest assembling possible.

No Assembling Steps Super Slim: Super Slim can be flashed and inked as a whole - no extra die box needed. Only the index card needs to be added as alwavs.

ULTIMARK PROTECTIVE FILM

The clear Trodat Ultimark Protective Film is placed on top of the printed vellum and is necessary for proper exposing results (prevents that toner from a printed vellum is transferred onto the foam).

Available in pre-cut size: 124mm x 114mm

TRODAT ROYAL MARK

The text plate for this pre-inked stamp is produced by laser. It is then filled with ink, so that no separate ink pad is required.

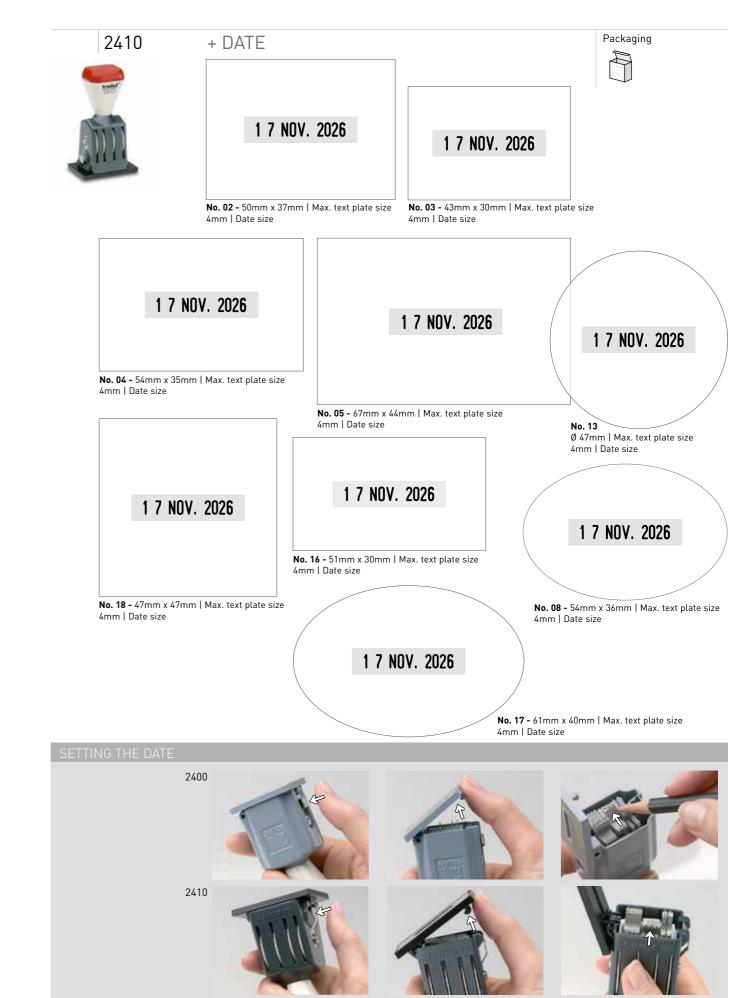

For production use microporous laserfoam (p.95).

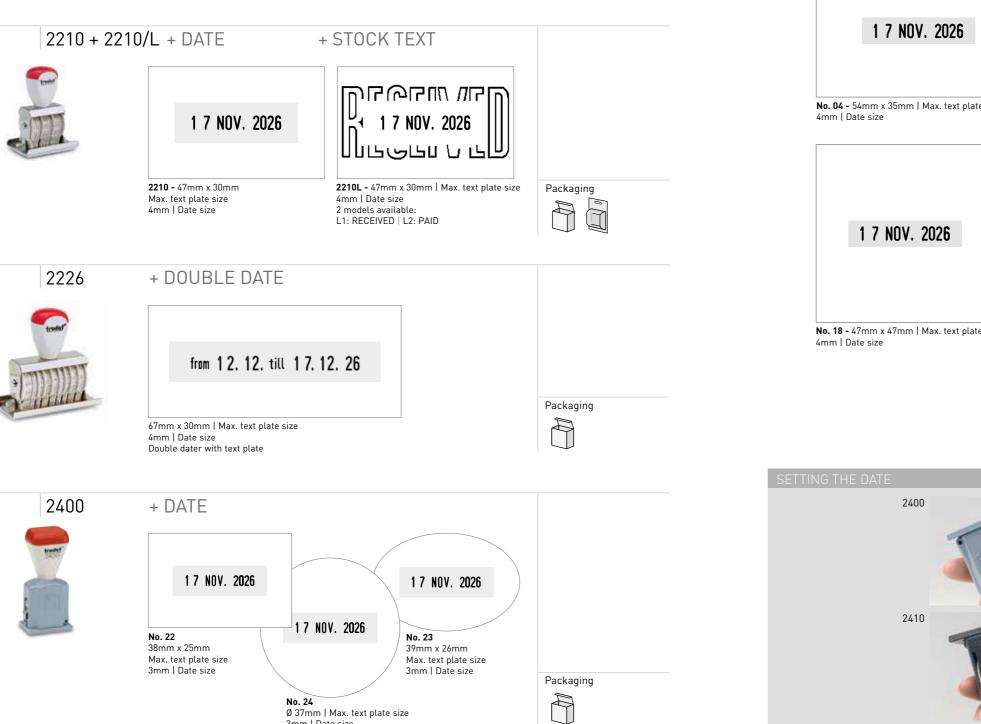

TRODAT CLASSIC

The models from the Trodat Classic line are true perennials. They are available in numerous models and sizes. Whether dater, numberer, text or time stamp, here more traditional users find the best product for their every requirement.

These hand stamps require a separate ink pad.
